

**TRANSACTIONS OF THE  
AMERICAN MATHEMATICAL SOCIETY  
INDEX, VOLUMES 187-200**

This index includes Memoirs published during the period  
January 1974—December 1974

	Vol.	Pages
AHARONOV, D. and LAVIE, M. Disjoint meromorphic functions and nonoscillatory differential systems .....	187	203–216
ALEXANDER, H. Volumes of images of varieties in projective space and in Grassmannians .....	189	237–249
ALEXANDER, RALPH and STOLARSKY, KENNETH B. Extremal problems of distance geometry related to energy integrals .....	193	1–31
ALIPRANTIS, CHARALAMBOS D. On the completion of Hausdorff locally solid Riesz spaces .....	196	105–125
ALPERT, SETH R. The genera of edge amalgamations of complete bigraphs .....	193	239–247
ANDREWS, GEORGE E. On the general Rogers-Ramanujan theorem .....		Memoir No. 152
APPLING, WILLIAM D. L. An isomorphism and isometry theorem for a class of linear functionals .....	199	131–140
ARGABRIGHT, LOREN and GIL DE LAMADRID, JESÚS, Fourier analysis of unbounded measures on locally compact Abelian groups .....		Memoir No. 145
ARMENDARIZ, EFRAIM P. and STEINBERG, STUART A. Regular self-injective rings with a polynomial identity .....	190	417–425
ARSOVE, MAYNARD and LEUTWILER, HEINZ. Quasi-bounded and singular functions .....	189	275–302
ASCHBACHER, MICHAEL. Finite groups with a proper 2-generated core .....	197	87–112
ASKEY, RICHARD and STEINIG, JOHN. Some positive trigonometric sums .....	187	295–307
AULT, JANET E. Semigroups with midunits .....	190	375–384
AUST, CATHERINE. Primitive elements and one relation algebras .....	193	375–387
AZOFF, EDWARD A. Spectrum and direct integral .....	197	211–223
BABALOLA, V. A. Semigroups of operators on locally convex spaces .....	199	163–179
BAERNSTEIN, ALBERT II. A generalization of the $\cos \pi\rho$ theorem .....	193	181–197
BAGBY, THOMAS and ZIEMER, WILLIAM P. Pointwise differentiability and absolute continuity .....	191	129–148
BAKER, KIRBY A. Primitive satisfaction and equational problems for lattices and other algebras .....	190	125–150

	Vol.	Pages
BANK, STEVEN B. A general representation theorem for analytic solutions of first-order algebraic differential equations in sectors .....	193	267-289
BANKS, D. O. and KUROWSKI, G. J. A Prüfer transformation for the equation of the vibrating beam .....	199	203-222
BAOUENDI, M. S. and GOULAOUIC C. Approximation of analytic functions on compact sets and Bernstein's inequality .....	189	251-261
BEACHY, JOHN A. $T$ -faithful subcategories and localization .....	195	61-79
BEAUREGARD, RAYMOND A. Right-bounded factors in an LCM domain .....	200	251-266
BEEM, R. PAUL. Smooth complex projective space bundles and $B\bar{U}(n)$ .....	199	399-411
BEKKEN, OTTO B. Rational approximation on product sets .....	191	301-316
BENNETT, G. and KALTON, N. J. Consistency theorems for almost convergence .....	198	23-43
BENZINGER, LEONORA. Uniformly distributed sequences in locally compact groups. I .....	188	149-165
— Uniformly distributed sequences in locally compact groups. II .....	188	167-178
BERGMAN, GEORGE M. Modules over coproducts of rings .....	200	1-32
— Coproducts and some universal ring constructions .....	200	33-88
BERKOVITZ, LEONARD D. Lower semicontinuity of integral functionals .....	192	51-57
BERKSON, EARL, KAUFMAN, ROBERT and PORTA, HORA-CIO. Möbius transformations of the disc and one-parameter groups of isometries of $H^p$ .....	199	223-239
BERMAN, STEPHEN J. Wave equations with finite velocity of propagation .....	188	127-148
BLASS, ANDREAS. Ultrafilter mappings and their Dedekind cuts .....	188	327-340
BLEI, RON C. Some thin sets in discrete abelian groups ....	193	55-65
BOLAND, PHILIP J. and DINEEN, SEAN. Convolution operators on $G$ -holomorphic functions in infinite dimensions .....	190	313-323
BOULDIN, RICHARD. Erratum to "Essential spectrum for a Hilbert space operator" .....	199	429
BOYLE, ANN K. Hereditary QI-rings .....	192	115-120
BRATTELI, OLA. Local norm convergence of states on the zero time Bose fields .....	188	269-280
BRITTON, DANIEL J. Goldie-like conditions on Jordan matrix rings .....	190	87-98
BROOKS, J. K. and LEWIS, P. W. Linear operators and vector measures .....	192	139-162
BROWN, DEAN R. $B$ -convexity and reflexivity in Banach spaces .....	187	69-76

	Vol.	Pages
BROWN, DEAN R. <i>P</i> -convexity and <i>B</i> -convexity .....	187	77-81
BROWN, E. M. and TUCKER, T. W. On proper homotopy theory for noncompact 3-manifolds .....	188	105-126
BROWN, EZRA. Class numbers of real quadratic number fields .....	190	99-107
BROWN, LEON, GAUTHIER, P. M. and SEIDEL, W. Complex approximation for vector-valued functions with an appli- cation to boundary behaviour .....	191	149-163
BROWN, RICHARD C. and KRALL, ALLAN M. Ordinary dif- ferential operators under Stieltjes boundary conditions ...	198	73-92
BRUALDI, RICHARD A. Weighted join-semilattices and trans- versal matroids .....	191	317-328
BUCKHIESTER, PHILIP G. Rank $r$ solutions to the matrix equation $XAX^T = C$ , $A$ alternate, over $GF(2^v)$ .....	189	201-209
BUNGE, MARTA C. Coherent extensions and relational al- gebras .....	197	355-390
BURGHELEA, DAN and LASHOF, RICHARD. The homot- opy type of the space of diffeomorphisms. I .....	196	1-36
— The homotopy type of the space of diffeomor- phisms. II .....	196	37-50
BURKINSHAW, OWEN. Weak compactness in the order dual of a vector lattice .....	187	183-201
BURTON, T. and GRIMMER, R. Erratum to "Oscillation, continuation and uniqueness of solutions of retarded differential equations" .....	187	429
BUTLER, G. J. and FREEDMAN, H. I. Periodic solutions of $x'' + g(x) + \mu h(x) = 0$ .....	197	59-74
CAIN, BRYAN E. The inertial aspects of Stein's condition $H - C^*HC \gg 0$ .....	196	79-91
CAMPBELL, DOUGLAS MICHAEL. Majorization-subordination theorems for locally univalent functions. III .....	198	297-306
CANNON, J. W. and LOVELAND, L. D. A 2-sphere in $E^3$ with vertically connected interior is tame .....	195	345-355
CERTAIN, MELINDA W. One-parameter semigroups holomor- phic away from zero .....	187	377-389
CHAFFER, ROBERT A. On a Wedderburn principal theorem for the flexible algebras .....	193	217-229
CHAPMAN, T. A. and WONG, R. Y. T. On homeomorphisms of infinite dimensional bundles. II .....	191	261-268
— On homeomorphisms of infinite dimensional bun- dles. III .....	191	269-276
CHEIN, ORIN. Moufang loops of small order. I .....	188	31-51
CHEN, BANG-YEN and OGUE, KOICHI. On totally real submanifolds .....	193	257-266

	Vol.	Pages
CHEN, SU-SHING and YOH, RICHARD W. The category of generalized Lie groups .....	199	281-294
CHERNOFF, PAUL R. Product formulas, nonlinear semigroups, and addition of unbounded operators .....		Memoir No. 140
CHILD, L. N. Mayer-Vietoris sequences and Brauer groups of nonnormal domains .....	196	51-67
CHIPMAN, J. C. Van Kampen's theorem for $n$ -stage covers	192	357-370
CHONG, KONG-MING. Spectral orders, uniform integrability and Lebesgue's dominated convergence theorem .....	191	395-404
— An induction principle for spectral and rearrangement inequalities .....	196	371-383
— Spectral order preserving matrices and Muirhead's theorem .....	200	437-444
CHU, BON-YAO. Symplectic homogeneous spaces .....	197	145-159
CLANCEY, KEVIN F. A local result for systems of Riemann-Hilbert barrier problems .....	200	315-325
CONLON, LAWRENCE. Transversally parallelizable foliations of codimension two .....	194	79-102
CORAM, DONALD. Semicellularity, decompositions and mappings in manifolds .....	191	227-244
CORNETTE, J. L. "Image of a Hausdorff arc" is cyclically extensible and reducible .....	199	253-267
CORWIN, LAWRENCE. Unitary measures on LCA groups ...	196	425-430
DALUGE, DENNIS. The space of conjugacy classes of a topological group .....	200	345-353
D'ARCHANGELO, JAMES. Linear ordinary differential equations with Laplace-Stieltjes transforms as coefficients .....	195	115-145
DAVIS, HENRY W. Generalized almost periodicity in groups	191	329-352
DEVENNEY, JAMES K. An intermediate theory for a purely inseparable Galois theory .....	198	287-295
DEVENNEY, JAMES and HEEREMA, NICKOLAS. Galois theory for fields $K/k$ finitely generated .....	189	263-274
DIESTEL, J. and FAIRES, B. On vector measures .....	198	253-271
DINEEN, SEÁN and BOLAND, PHILIP J. Convolution operators on $G$ -holomorphic functions in infinite dimensions	190	313-323
DJOKOVIĆ, D. Ž. Linear transformations on matrices .....	198	93-106
DODDS, THERESA K. Y. CHOW. Egoroff properties and the order topology in Riesz spaces .....		187 365-375
DONALDSON, THOMAS. A Laplace transform calculus for partial differential operators .....		Memoir No. 143
DOWLING, THOMAS A. and WILSON, RICHARD M. The slimmest geometric lattices .....	196	203-215
DRAGOSH, STEPHEN. Koebe sequences of arcs and normal meromorphic functions .....	190	207-222

	Vol.	Pages
DUNKL, CHARLES F. and RAMIREZ, DONALD E. Erratum to "Weakly almost periodic functionals on the Fourier algebra" .....	190	427
DUSHANE, THEODORE E. On existence and uniqueness for a new class of nonlinear partial differential equations using compactness methods and differential difference schemes .....	188	77-96
EDWARDS, J. R. and WAYMENT, S. G. Extensions of the $\nu$ -integral .....	191	165-184
ELLIOTT, ROBERT J. and KALTON, NIGEL J. Cauchy problems for certain Isaacs-Bellman equations and games of survival .....	198	45-72
ELLIS, RICHARD S. Chapman-Enskog-Hilbert expansion for the Ornstein-Uhlenbeck process and the approximation of Brownian motion .....	199	65-74
ELSON, CONSTANCE M. An extension of Weyl's lemma to infinite dimensions .....	194	301-324
ERNST, LAWRENCE R. A proof that $H^2$ and $T^2$ are distinct measures .....	191	363-372
FAIRES, B. and DIESTEL, J. On vector measures .....	198	253-271
FARKAS, DANIEL R. and SNIDER, ROBERT L. Group algebras whose simple modules are injective .....	194	241-248
FAUNTLOROY, AMASSA. Rational points of commutator subgroups of solvable algebraic group .....	194	249-275
FEFFERMAN, C., RIVIERE, N. M. and SAGHER, Y. Interpolation between $H^p$ spaces: The real method .....	191	75-81
FISHER, S. D. and JEROME, J. W. The existence, characterization and essential uniqueness of solutions of $L^\infty$ extremal problems .....	187	391-404
FITZPATRICK, P. M. On the structure of the set of solutions of equations involving A-proper mappings .....	189	107-131
FITZPATRICK, P. M. and PETRYSHYN, W. V. A degree theory, fixed point theorems, and mapping theorems for multivalued noncompact mappings .....	194	1-25
FREEDMAN, H. I. and BUTLER, G. J. Periodic solutions of $x'' + g(x) + \mu h(x) = 0$ .....	197	59-74
FRIEDMAN, AVNER. Nonattainability of a set by a diffusion process .....	197	245-271
FROLIK, ZDENĚK. Locally $\sigma$ -fine measurable spaces .....	196	237-247
FUJII, AKIO. On the zeros of Dirichlet $L$ -functions. I .....	196	225-235
GAGLIONE, ANTHONY M. On free products of finitely generated abelian groups .....	195	421-430
GAUGER, MICHAEL A. Duality theories for metabelian Lie algebras .....	187	89-102

	Vol.	Pages
CHEN, SU-SHING and YOH, RICHARD W. The category of generalized Lie groups .....	199	281-294
CHERNOFF, PAUL R. Product formulas, nonlinear semi-groups, and addition of unbounded operators .....		Memoir No. 140
CHILD, L. N. Mayer-Vietoris sequences and Brauer groups of nonnormal domains .....	196	51-67
CHIPMAN, J. C. Van Kampen's theorem for $n$ -stage covers	192	357-370
CHONG, KONG-MING. Spectral orders, uniform integrability and Lebesgue's dominated convergence theorem .....	191	395-404
An induction principle for spectral and rearrangement inequalities .....	196	371-383
Spectral order preserving matrices and Muirhead's theorem .....	200	437-444
CHU, BON-YAO. Symplectic homogeneous spaces .....	197	145-159
CLANCEY, KEVIN F. A local result for systems of Riemann-Hilbert barrier problems .....	200	315-325
CONLON, LAWRENCE. Transversally parallelizable foliations of codimension two .....	194	79-102
CORAM, DONALD. Semicellularity, decompositions and mappings in manifolds .....	191	227-244
CORNETTE, J. L. "Image of a Hausdorff arc" is cyclically extensible and reducible .....	199	253-267
CORWIN, LAWRENCE. Unitary measures on LCA groups ...	196	425-430
DALUGE, DENNIS. The space of conjugacy classes of a topological group .....	200	345-353
D'ARCHANGELO, JAMES. Linear ordinary differential equations with Laplace-Stieltjes transforms as coefficients .....	195	115-145
DAVIS, HENRY W. Generalized almost periodicity in groups	191	329-352
DEVENNEY, JAMES K. An intermediate theory for a purely inseparable Galois theory .....	198	287-295
DEVENNEY, JAMES and HEEREMA, NICKOLAS. Galois theory for fields $K/k$ finitely generated .....	189	263-274
DIESTEL, J. and FAIRES, B. On vector measures .....	198	253-271
DINEEN, SEÁN and BOLAND, PHILIP J. Convolution operators on $G$ -holomorphic functions in infinite dimensions	190	313-323
DJOKOVIĆ, D. Ž. Linear transformations on matrices .....	198	93-106
DODDS, THERESA K. Y. CHOW. Egoroff properties and the order topology in Riesz spaces .....		187 365-375
DONALDSON, THOMAS. A Laplace transform calculus for partial differential operators .....		Memoir No. 143
DOWLING, THOMAS A. and WILSON, RICHARD M. The slimmest geometric lattices .....	196	203-215
DRAGOSH, STEPHEN. Koebe sequences of arcs and normal meromorphic functions .....	190	207-222

	Vol.	Pages
DUNKL, CHARLES F. and RAMIREZ, DONALD E. Erratum to "Weakly almost periodic functionals on the Fourier algebra" .....	190	427
DUSHANE, THEODORE E. On existence and uniqueness for a new class of nonlinear partial differential equations using compactness methods and differential difference schemes .....	188	77-96
EDWARDS, J. R. and WAYMINT, S. G. Extensions of the $\nu$ -integral .....	191	165-184
ELLIOTT, ROBERT J. and KALTON, NIGEL J. Cauchy problems for certain Isaacs-Bellman equations and games of survival .....	198	45-72
ELLIS, RICHARD S. Chapman-Enskog-Hilbert expansion for the Ornstein-Uhlenbeck process and the approximation of Brownian motion .....	199	65-74
ELSON, CONSTANCE M. An extension of Weyl's lemma to infinite dimensions .....	194	301-324
ERNST, LAWRENCE R. A proof that $H^2$ and $T^2$ are distinct measures .....	191	363-372
FAIRES, B. and DIESTEL, J. On vector measures .....	198	253-271
FARKAS, DANIEL R. and SNIDER, ROBERT L. Group algebras whose simple modules are injective .....	194	241-248
FAUNTROY, AMASSA. Rational points of commutator subgroups of solvable algebraic group .....	194	249-275
FEFFERMAN, C., RIVIERE, N. M. and SAGHER, Y. Interpolation between $H^p$ spaces: The real method .....	191	75-81
FISHER, S. D. and JEROME, J. W. The existence, characterization and essential uniqueness of solutions of $L^\infty$ extremal problems .....	187	391-404
FITZPATRICK, P. M. On the structure of the set of solutions of equations involving A-proper mappings .....	189	107-131
FITZPATRICK, P. M. and PETRYSHYN, W. V. A degree theory, fixed point theorems, and mapping theorems for multivalued noncompact mappings .....	194	1-25
FREEDMAN, H. I. and BUTLER, G. J. Periodic solutions of $x'' + g(x) + \mu h(x) = 0$ .....	197	59-74
FRIEDMAN, AVNER. Nonattainability of a set by a diffusion process .....	197	245-271
FROLIK, ZDENĚK. Locally $\epsilon$ -fine measurable spaces .....	196	237-247
FUJII, AKIO. On the zeros of Dirichlet $L$ -functions. I .....	196	225-235
GAGLIONE, ANTHONY M. On free products of finitely generated abelian groups .....	195	421-430
GAUGER, MICHAEL A. Duality theories for metabelian Lie algebras .....	187	89-102

	Vol.	Pages
GAUTHIER, P. M., SEIDEL, W. and BROWN, LEON. Complex approximation for vector-valued functions with an application to boundary behaviour .....	191	149-163
GELBART, STEPHEN S. A theory of Stiefel harmonics .....	192	29-50
GEOGHEGAN, ROSS and SUMMERHILL, R. RICHARD. Pseudo-boundaries and pseudo-interiors in euclidean spaces and topological manifolds .....	194	141-165
GILBERT, ROBERT P. and HILE, GERALD. Generalized hypercomplex function theory .....	195	1-29
GIL DE LAMADRID, JESÚS and ARGABRIGHT, LOREN. Fourier analysis of unbounded measures on locally compact Abelian groups .....		Memoir No. 145
GIROUX, A. and RAHMAN, Q. I. Inequalities for polynomials with a prescribed zero .....	193	67-98
GLASNER, SHMUEL. Topological dynamics and group theory .....	187	327-334
GLEIT, ALAN. On the construction of split-face topologies .....	194	291-299
GORENSTEIN, DANIEL and HARADA, KOICHIRO. Finite groups whose 2-subgroups are generated by at most 4 elements .....		Memoir No. 147
GORDON, CARL E. Prime and search computability, characterized as definability in certain sublanguages of constructible $L_{\omega_1, \omega}$ .....	197	391-407
GOSSEZ, JEAN-PIERRE. Nonlinear elliptic boundary value problems for equations with rapidly (or slowly) increasing coefficients .....	190	163-205
GOULAOUIC, C. and BAOUENDI, M. S. Approximation of analytic functions on compact sets and Bernstein's inequality .....	189	251-261
GRABINER, SANDY. Derivations and automorphisms of Banach algebras of power series .....		Memoir No. 146
GRANIRER, EDMOND E. Weakly almost periodic and uniformly continuous functionals on the Fourier algebra of any locally compact group .....	189	371-382
GREEN, MARK. On the functional equation $f^2 = e^{2\phi_1} + e^{2\phi_2} + e^{2\phi_3}$ and a new Picard theorem .....	195	223-230
GRIMMER, R. Oscillation criteria and growth of nonoscillatory solutions of even order ordinary and delay-differential equations .....	198	215-228
GRIMMER, R. and BURTON, T. Erratum to "Oscillation, continuation and uniqueness of solutions of retarded differential equations" .....	187	429
GROSS, FRED and YANG, CHUNG-CHUN. Further results on prime entire functions .....	192	347-355

	Vol.	Pages
GROVE, EDWARD A. $SU(n)$ actions on differentiable manifolds with vanishing first and second integral Pontrjagin classes .....	196	331-350
GUGENHEIM, V. K. A. M. and MAY, J. PETER. On the theory and applications of differential torsion products .....		Memoir No. 142
GUPTA, MANJUL and KAMTHAN, P. K. Expansion of entire functions of several complex variables having finite growth .....	192	371-382
HAGOPIAN, CHARLES L. $\lambda$ connected plane continua .....	191	277-287
HALLENBECK, D. J. Convex hulls and extreme points of some families of univalent functions .....	192	285-292
HANNEKEN, C. B. Irreducible congruences over $GF(2)$ .....	193	291-301
HANSELL, ROGER W. On Borel mappings and Baire functions .....	194	195-211
HARADA, KOICHIRO and GORENSTEIN, DANIEL. Finite groups whose 2-subgroups are generated by at most 4 elements .....		Memoir No. 147
HARIS, STEPHEN J. A Siegel formula for orthogonal groups over a function field .....	190	223-231
HARRELL, R. E. and KARLOVITZ, L. A. The geometry of flat Banach spaces .....	192	209-218
HARRIS, DOUGLAS. Semirings and $T_1$ compactifications. I .....	188	241-258
HATCHER, ALLAN and QUINN, FRANK. Bordism invariants of intersections of submanifolds .....	200	327-344
HAYES, D. R. Explicit class field theory for rational function fields .....	189	77-91
HAVER, WILLIAM E. The closure of the space of homeomorphisms on a manifold .....	195	401-419
HEEREMA, NICKOLAS and DEVENNEY, JAMES. Galois theory for fields $K/k$ finitely generated .....	189	263-274
HEEREMA, NICKOLAS and THWING, HENRY W. Fields of constants of integral derivations on a $p$ -adic field .....	195	277-290
HEIN, JAMES L. The convertibility of $\text{Ext}_R^n(-, A)$ .....	195	243-264
HEISEY, RICHARD E. Contracting spaces of maps on the countable direct limit of a space .....	193	389-411
HENSON, C. WARD and MOORE, L. C., JR. Subspaces of the nonstandard hull of a normed space .....	197	131-143
HERZ, CARL. Bounded mean oscillation and regulated martingales .....	193	199-215
HILE, GERALD and GILBERT, ROBERT P. Generalized hypercomplex function theory .....	195	1-29
HILL, LINDA. Henselian valued fields with prescribed value group and residue field .....	195	213-222

	Vol.	Pages
HILL, PAUL. Countable unions of totally projective groups	190	385-391
— New criteria for freeness in abelian groups. II .....	196	191-201
HOFMANN, KARL H. and LIUKKONEN, J. R., Editors. Recent advances in the representation theory of rings and $C^*$ -algebras by continuous sections .....		Memoir No. 148
HUANG, WU-HSIUNG. Equivariant method for periodic maps .....	189	175-183
HUDSON, RICHARD H. Power residues and nonresidues in arithmetic progressions .....	194	277-289
HUDSON, WILLIAM N. and TUCKER, HOWARD G. Limit theorems for variational sums .....	191	405-426
HUNG, H. H. and NEGREPONTIS, S. Spaces homeomorphic to $(2^\alpha)_\alpha$ . II .....	188	1-30
IBERKLEID, WOLF. Splitting the tangent bundle .....	191	53-59
IMORU, CHRISTOPHER O. Series inequalities involving convex functions .....	199	241-252
ISKANDER, AWAD A. Product of ring varieties and attainability .....	193	231-238
JATEGAONKAR, ARUN VINAYAK. Injective modules and localization in noncommutative Noetherian rings .....	190	109-123
JATEGAONKAR, VASANTI A. Global dimension of tiled orders over commutative noetherian domains .....	190	357-374
— Global dimension of tiled orders over a discrete valuation ring .....	196	313-330
JEROME, J. W. and FISHER, S. D. The existence, characterization and essential uniqueness of solutions of $L^\infty$ extremal problems .....	187	391-404
JOHNSON, DUDLEY PAUL. Representations and classifications of stochastic processes .....	188	179-197
JOHNSON, JOSEPH. Kähler differentials and differential algebra in arbitrary characteristic .....	192	201-208
JORDAN, G. S. Regularly varying functions and convolutions with real kernels .....	194	177-194
KALTON, NIGEL J. and BENNETT, G. Consistency theorems for almost convergence .....	198	23-43
KALTON, NIGEL J. and ELLIOTT, ROBERT J. Cauchy problems for certain Isaacs-Bellman equations and games of survival .....	198	45-72
KAMTHAN, P. K. and GUPTA, MANJUL. Expansion of entire functions of several complex variables having finite growth .....	192	371-382
KARLOVITZ, L. A. and HARRELL, R. E. The geometry of flat spaces .....	192	209-218

	Vol.	Pages
KATZ, JEROME M. Semi-isotopies and the lattice of inner ideals of certain quadratic Jordan algebras .....	199	413-427
KAUFMAN, ROBERT. Sets of multiplicity and differentiable functions. II .....	280	427-435
KAUFMAN, ROBERT, PORTA, HORACIO and BERKSON, EARL. Möbius transformations of the disc and one-parameter groups of isometries of $H^p$ .....	199	223-239
KEESLING, JAMES. An algebraic property of the Čech cohomology groups which prevents local connectivity and movability .....	190	151-162
— Shape theory and compact connected abelian topological groups .....	194	349-358
KEESLING, JAMES and WILSON, DAVID C. The group of PL-homeomorphisms of a compact PL-manifold is an $L_2^f$ -manifold .....	193	249-256
KERTZ, ROBERT P. Perturbed semigroup limit theorems with applications to discontinuous random evolutions .....	199	29-53
KETONEN, JUSSI. Some combinatorial principles .....	188	387-394
KIANG, MO TAK. Fixed point theorems for certain classes of semigroups of mappings .....	189	63-76
KIM, Y. J. and MERKES, E. P. On certain convex sets in the space of locally schlicht functions .....	196	217-224
KING, JAMES R. Global residues and intersections on a complex manifold .....	192	163-199
KRAJKIEWICZ, P. Polyanalytic functions with exceptional values .....	197	181-210
KRALL, ALLAN M. and BROWN, RICHARD C. Ordinary differential operators under Stieltjes boundary conditions .....	198	73-92
KRANZLER, S. K. and McDERMOTT, T. S. Extending continuous linear functionals in convergence vector spaces .....	200	149-168
KRONSTADT, ERIC P. Interpolating sequences in polydisks ...	199	369-398
KUROWSKI, G. J. and BANKS, D. O. A Prüfer transformation for the equation of the vibrating beam .....	199	203-222
